

Streamline business processes and increase profits

Many of our day to day activities are understandably performed the same way they've always been done.

Being immersed everyday in your business, it's hard to see alternative ways of performing tasks and processes, and it's just as hard to be aware of new technology solutions that will genuinely make business easier. Such opportunities are vital because they can genuinely reduce your overheads and at the same time improve process reliability and quality.

Seratec process management solutions can streamline, rationalise and deliver outstanding results with amazingly fast payback. You can reduce labour involvement, increase dependability of outcomes, reduce errors, and even help you reach your customers more regularly.

Call Seratec for help streamlining your business processes.

Knowledge & document management to reduce risk and increase performance

Collecting, storing and securely sharing knowledge and valuable documents can be an important key to improving your business. We all know how important multi-tasking is, but there are some areas of expertise that seem harder to collect and share knowledge than others. These areas represent the highest risk to your business.

With Seratec solutions, you can efficiently collect, share and control all types of knowledge and information. You will quantifiably reduce risk, while simultaneously increasing productivity for staff, trading partners and customers. You will reduce the workload on various individuals and teams as well as enabling everyone to perform beyond their personal expertise.

Knowledge may include;

- Policies or Procedures
- How-to information
- Learned solutions to issues
- Product or technical information
- General knowledge

Mobile computing & remote access for increased productivity

If you want to be more efficient and productive, you need ready access to your business systems from anywhere, whether you are in an airport lounge, on a beach in Fiji, in a field in the country or in a clients office locally or on the other side of the world.

Too many office systems are of legacy design and are not normally capable of this freedom, which you could really benefit from. Consider your sales, service, production, dispatch, management and financial systems.

Seratec can help you affordably solve these issues, and in some cases, you may not even need to replace your existing systems.

Call now for a no obligation discussion, or fax back the fast response form.

Automated reporting super low cost, with massive ROI

Have you ever added up how much lost productivity there is in your organisation as a result of staff manually finding and printing regular reports.

Have you been to a meeting where someone failed to print or pre-supply the reports needed to conduct the meeting effectively?

Maybe you have suffered the anxiety of trying to print or disseminate your management reports at the last minute, only to find the printer or PC has a problem.

All these issues can be thing of the past. Reclaim you and your staff's productivity by using Seratec's automated report scheduler. It automates the running of Crystal Reports. You can specify which printers to use, or you may choose to have the reports automatically emailed to one person or a group of people. You can specify a suitable frequency of production.

Call now for the amazingly low cost.

Easy task management for better business reliability

When you consider the cumulative consequences that overlooked and delayed tasks are having on your business, you can't help but conclude that it is a serious problem. One that we often incorrectly assume has no affordable solution.

Seratec can provide you with smart, affordable task management for a wide range of areas within your business.

You will enjoy absolute certainty that no task can ever be unknowingly overlooked. Your business processes and procedures will be followed with certainty. Seratec solutions also provide a range of business tools that help increase the productivity of all your staff, well beyond your expectation.

We provide solutions including;

- IT & equipment problem management
- General everyday business tasks
- Customer information requests / complaints, OH&S etc.

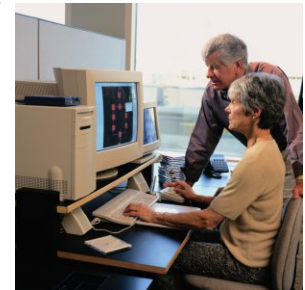

Custom software affordably developed to

Until recently, having software developed to suit your particular organisations individual needs, was not affordable or practical, for a range of reasons.

But that has all changed.

Seratec uses a new fully tried and proven Microsoft technology that enables the development of custom solutions with a range of benefits, including;

- Highly robust
- Rapid & risk free development
- Superior functionality
- Inbuilt system intelligence
- Inbuilt workflow processes
- Exceptional system flexibility
- Low development cost
- Very low cost licensing
- Tailored to your business
- Provides full range of global access capabilities.
